² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters (Excluded waters $((b)(1) - (b)(12))$:						
Exclusion Name Exclusion Size			Exclusion ⁵	Rationale for Exclusion Determination			
Wetlands 3, 6, 7	0.06	acre(s)	(b)(1) Non-adjacent wetland.	Wetlands are surrounded by uplands and are not separated from an $(a)(1)$ - $(a)(3)$ water by natural or man-made barriers. These wetlands are not flooded by $(a)(1)$ - $(a)(3)$ water in a typical year.			
Wetlands 2, 4, 8(B)	0.20	acre(s)	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	Wetland 2 is a man-made ephemeral feature while Wetlands 4 and 8(B) are natural features with an ephemeral flow.			
Wetland 8(A)	0.55	acre(s)	(b)(1) Non- adjacent wetland.	This wetland abuts Wetland 8(B) which is an ephemeral feature that transports water into Wetland 8(A). Wetland 8(A) is not separated from an (a)(1)-(a)(3) water by natural or manmade barriers and is not flooded by an (a)(1)-(a)(3) water in a typical year.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
