**SECTION II: SUMMARY OF FINDINGS**

**A. RHA SECTION 10 DETERMINATION OF JURISDICTION.**

There are no “*navigable waters of the U.S.*” within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area.

**B. CWA SECTION 404 DETERMINATION OF JURISDICTION.**

There are no “*waters of the U.S.*” within Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area.

**1. Waters of the U.S.: N/A**

**2. Non-regulated waters/wetlands (check if applicable):<sup>1</sup>**

- ☒ Potentially jurisdictional waters and/or wetlands were assessed within the review area and determined to be not jurisdictional. Explain: **The review area for this jurisdictional determination is the extent of wetlands 1 and 4 identified as Type 2, fresh (wet) meadows and wetlands 2 and 3 identified as Type 6, shrub carr wetlands within the review area. The wetlands are depressional basins located within a commercial area and do not have a surface or shallow subsurface hydrologic connection to any navigable waters or their tributaries. Based upon a review of aerial photographs, United States Geological Survey (USGS) 1:24K Quad and its associated National Hydrography Dataset (NHD), Natural Resource Conservation Service (NRCS) soil survey, National Wetland Inventory (NWI) maps, topography data, and the materials submitted, the wetlands have been determined to be hydrologically isolated with no surface water connection to any waters of the United States (WOUS). The closest tributary identified by the USGS NHD is Minneopa Creek which outlets into the Minnesota River. It is located approximately 1800' south of the wetlands. Agricultural fields and a transportation corridor are located between the tributary and the wetlands. The wetlands are surrounded by upland, and have no swales, ditches, pipes, or other means that would provide a surface or subsurface connection to a WOUS. We have determined that wetlands 1-4 are isolated depressions and hydrologically separated from other aquatic resources. The surrounding land uses comprised of agricultural and transportation uses do not provide cover or habitat between the wetlands and other aquatic resources. The wetlands do not have an ecological connection to a WOUS.**

**The wetlands do not support a link to interstate or foreign commerce because they are not known to be used by interstate or foreign travelers for recreation or other purposes; do not produce fish or shellfish**

<sup>1</sup> Supporting documentation is presented in Section III.F.

that could be taken and sold in interstate or foreign commerce; and are not known to be used for industrial purposes by industries in interstate or foreign commerce. The wetlands were determined to not be WOUS and therefore not to be jurisdictional under the CWA.

### **SECTION III: CWA ANALYSIS**

**A. TNWs AND WETLANDS ADJACENT TO TNWs:** N/A

**B. CHARACTERISTICS OF TRIBUTARY (THAT IS NOT A TNW) AND ITS ADJACENT WETLANDS (IF ANY):** N/A

**C. SIGNIFICANT NEXUS DETERMINATION:** N/A

**D. DETERMINATIONS OF JURISDICTIONAL FINDINGS. THE SUBJECT WATERS/WETLANDS ARE (CHECK ALL THAT APPLY):** N/A

**E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS, INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, INCLUDING ANY SUCH WATERS (CHECK ALL THAT APPLY):** N/A

**F. NON-JURISDICTIONAL WATERS, INCLUDING WETLANDS (CHECK ALL THAT APPLY):**

- ☐ If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements.
- ☒ Review area included isolated waters with no substantial nexus to interstate (or foreign) commerce.
  - ☒ Prior to the Jan 2001 Supreme Court decision in “*SWANCC*,” the review area would have been regulated based solely on the “Migratory Bird Rule” (MBR).
- ☐ Waters do not meet the “Significant Nexus” standard, where such a finding is required for jurisdiction. Explain:
- ☐ Other (explain, if not covered above):

Provide acreage estimates for non-jurisdictional waters in the review area, where the sole potential basis of jurisdiction is the MBR factors (i.e., presence of migratory birds, presence of endangered species, use of water for irrigated agriculture), using best professional judgment (check all that apply):

- ☐ Non-wetland waters (i.e., rivers, streams):          linear feet          width (ft).
- ☐ Lakes/ponds:          acres.
- ☐ Other non-wetland waters:          acres. List type of aquatic resource:          .
- ☒ Wetlands: Wetland 1: 0.01 ac, Wetland 2: 0.01 ac, Wetland 3: 0.01 ac and Wetland 4: 0.15 acres.

Provide acreage estimates for non-jurisdictional waters in the review area that do not meet the “Significant Nexus” standard, where such a finding is required for jurisdiction (check all that apply):

- ☐ Non-wetland waters (i.e., rivers, streams):          linear feet,          width (ft).
- ☐ Lakes/ponds:          acres.
