II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- ☐ The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- ☐ There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- ☐ There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- ☒ There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴ The review area for this AJD is limited to Wetland 4.				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
Wetland 4	5.15	acre(s)	(b)(1) Non-adjacent wetland.	Wetland 4 is part of a large wetland complex that extends outside of the project boundary. The contour map submitted in the De Minimis application indicates that Wetland 4 is a depressional basin, completely surrounded by uplands. The Corps reviewed topographic maps from 1909 and 2013. The 1909 Rockford MN topographic map indicates that Wetland 4 may have been connected to a larger wetland complex, east of Pioneer Tail, but does not show any surface water connection between the wetland complex and an a(1)-a(3) water. This was confirmed by the 2013 topographic map which shows no possible a(1)-a(3) waters within the vicinity of Wetland 4. Google Earth aerial imagery confirmed the findings from the contour and topographic maps. Wetland 4 does not share a surface water connection with an a(1)-a(3) water. Therefore, Wetland 4 is not considered a water of the U.S. under the Navigable Waters Protection Rule.

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

- ☒ Information submitted by, or on behalf of, the applicant/consultant: [The De Minimis Application – Korin Driveway Project, Medina MN dated February 1, 2021 and submitted by Kjolhaug.](#)

This information is and is not sufficient for purposes of this AJD.

Rationale: [Additional topographic maps and Google Earth aerial imagery was needed to determine if Wetland 4 shared a surface water connection with an a\(1\)-a\(3\) water.](#)

- ☐ Data sheets prepared by the Corps: [Title\(s\) and/or date\(s\).](#)
- ☒ Photographs: [Aerial: Google Earth 1991, 2002-2006, 2008-2020](#)
- ☐ Corps site visit(s) conducted on: [Date\(s\).](#)
- ☐ Previous Jurisdictional Determinations (AJDs or PJDs):
- ☐ Antecedent Precipitation Tool: [provide detailed discussion in Section III.B.](#)
- ☐ USDA NRCS Soil Survey: [Title\(s\) and/or date\(s\).](#)
- ☐ USFWS NWI maps: [Title\(s\) and/or date\(s\).](#)
- ☒ USGS topographic maps: [1909 Rockford MN and 2013 National Geographic Society](#)

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
