- F. NON-JURISDICTIONAL WATERS, INCLUDING WETLANDS (CHECK ALL THAT APPLY):
- Other: (explain, if not covered above): Based on information provided in a recent wetland delineation report, the wetlands within the review areas were excavated in uplands to act as drainage ditches. The Corps has determined that Wetland Areas A, B, & G within the review areas shown on MVP-2019-02966-RJH Page 2 of 2 were excavated wholly in and drain dry land only. Additionally, it has been determined that the subject ditch portions do not have relativley permanent flow. In accordance with the preamble to the 1986 Corps Regulations (33 CFR Parts 320-330), the Corps does not generally consider the following waters to be waters of the United States; non-tidal drainage ditches excavated on dry land. Further clarification is provided in the December 2, 2008 Revised Guidance on Clean Water Act

If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers

Jurisdiction following the Supreme Court Decision in Rapanos v. U.S. and Carabell v. U.S. issued jointly by the Corps and EPA which indicates that ditches excavated wholly in and draining only uplands and do not carry a relatively permanent flow are not waters of the United States.
