The NRCS soil mapping indicates that the majority of the review area is mapped as Kolberg silt loam (KoB), which is a well drained soil typically found in till plains with 2-6% slopes. The Wisconsin Wetland Inventory shows no mapped wetlands and the WDNR Surface Water Data Viewer shows no mapped waterways present in the review area. On-site photos appear to show an upland field. We have determined that the 1.65 acre review area is entirely upland and contains no waters of the United States.**
