**I. ADMINISTRATIVE INFORMATION**

Completion Date of Approved Jurisdictional Determination (AJD): 11/2/2020

ORM Number: MVP-2020-01821-MMG

Associated JDs: N/A

Review Area Location<sup>1</sup>: State/Territory: Wisconsin City: Kewaskum County/Parish/Borough: Washington

Center Coordinates of Review Area: Latitude 43.527558 Longitude -88.236575

**II. FINDINGS**

**A. Summary:** Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- ☐ The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A
- ☐ There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- ☐ There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- ☒ There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

<sup>1</sup> Map(s)/figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

**D. Excluded Waters or Features**

Excluded waters ((b)(1) – (b)(12)): <sup>4</sup>				
Exclusion Name	Exclusion Size		Exclusion <sup>5</sup>	Rationale for Exclusion Determination
W-2 W-3	0.007 0.021	acre(s)	(b)(1) Non-adjacent wetland.	W-2 and W-3 do not abut at least one point or side of a (a)(1)-(3) water. There is no natural berm, bank, dune, or similar artificial structure physically separating these wetlands from an (a)(1)-(3) water. The closest mapped water, a tributary to the Milwaukee River, is approximately 500 feet to the south on the other side of a residential road at approximately 948' in elevation. Each of the wetlands is located within a depression with W-2 at a low point between the 955' and 954' elevation contours while W-3 is at a low point between the 960' and 959' elevation contour lines. Based on the U.S. Geological Survey, Washington County GIS 1-foot elevation and FEMA map, these wetlands would not be flooded by an (a)(1)-(3) water in a typical year.

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
