¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

| Excluded waters ((b)(1) – (b)(12)): ⁴ | | | | |
|--|----------------|---------|------------------------------|---|
| Exclusion Name | Exclusion Size | | Exclusion ⁵ | Rationale for Exclusion Determination |
| Wetland 1 | 0.005 | acre(s) | (b)(1) Non-adjacent wetland. | Wetland 1 is a seasonally flooded basin wetland with no natural and direct surface water connections. There is a culvert that drains the wetland to the west but not directly into a surface water. Wetland 1 is in a forested residential suburban neighborhood with a road on its western border. Contour maps, aerial imagery, and wetland boundary information submitted by the applicant in the December 14, 2020 Joint Application show the wetland is immediately surrounded by forested uplands. Therefore, Wetland 1 does not abut an (a)(1)-(3) water and it is not a water of the U.S. |

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

☒ Information submitted by, or on behalf of, the applicant/consultant: [500 Pineview Land North Wetland Delineation Report and Joint Application, Kjolhaug Environmental, December 14, 2020](#)

This information is and is not sufficient for purposes of this AJD.

Rationale: [The information submitted did not include sufficient aerial imagery to determine if the drainage connects to a jurisdictional surface water.](#)

☐ Data sheets prepared by the Corps: [Title\(s\) and/or date\(s\).](#)

☒ Photographs: [Aerial: Google Earth Imagery 2020](#)

☐ Corps site visit(s) conducted on: [Date\(s\).](#)

☐ Previous Jurisdictional Determinations (AJDs or PJDs): [ORM Number\(s\) and date\(s\).](#)

☐ Antecedent Precipitation Tool: [provide detailed discussion in Section III.B.](#)

☒ USDA NRCS Soil Survey: [Delineation Report, Figure 4](#)

☒ USFWS NWI maps: [Delineation Report, Figure 3](#)

☒ USGS topographic maps: [Delineation Report, Figure 2](#)

Other data sources used to aid in this determination:

| Data Source (select) | Name and/or date and other relevant information |

| USGS Sources | N/A. |
| USDA Sources | N/A. |
| NOAA Sources | N/A. |
| USACE Sources | N/A. |
| State/Local/Tribal Sources | N/A. |

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
