II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- ☐ The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- ☐ There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- ☐ There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- ☒ There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
Wetland 7	0.02 acre	acre(s)	(b)(1) Non-adjacent wetland.	This wetland is a small depression in an agricultural field that collects water from precipitation and overland flow. The wetland is surrounded by upland, as shown in the wetland delineation. This shows the wetland does not continue to abut an a(1)-a(3) water. The nearest tributary is approximately 610 linear feet north of the wetland and topographic maps show that there is no single natural feature separating the wetland from an a(1)-a(3) water. The wetland is outside of the 100 year flood plain of the nearest tributary and also outside the Apple Creek 100 year floodplain.

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

☒ Information submitted by, or on behalf of, the applicant/consultant: **Davel Engineering AJD request dated 10/21/2020**

This information **is** sufficient for purposes of this AJD.

Rationale: **N/A**

- ☐ Data sheets prepared by the Corps: **Title(s) and/or date(s)**.
- ☐ Photographs: **Aerial: Title(s) and/or date(s)**.
- ☐ Corps site visit(s) conducted on: **Date(s)**.
- ☐ Previous Jurisdictional Determinations (AJDs or PJDs): **ORM Number(s) and date(s)**.
- ☐ Antecedent Precipitation Tool: **provide detailed discussion in Section III.B.**
- ☐ USDA NRCS Soil Survey: **Title(s) and/or date(s)**.
- ☐ USFWS NWI maps: **Title(s) and/or date(s)**.
- ☐ USGS topographic maps: **Title(s) and/or date(s)**.

Other data sources used to aid in this determination:

Data Source (select)	Name and/or date and other relevant information
USGS Sources	N/A.
USDA Sources	N/A.
NOAA Sources	N/A.
USACE Sources	N/A.
Other state/local data (specify)	Outagamie Co. FEMA maps
Other Sources	N/A.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
