

CORPS FACTS

Bay City Harbor

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG®

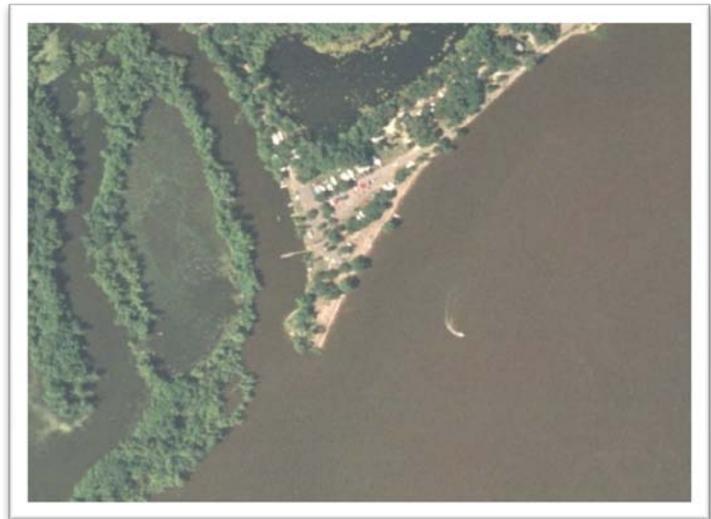

The Bay City Harbor is downstream of Lock and Dam 3 in the city of Bay City, Wis. It is located at Upper Mississippi River mile 786.5 on the left descending side. The city of Bay City is the non-federal sponsor for the project and is required to furnish a suitable placement site for the dredged material.

Details

The harbor was completed Sept. 8, 1965, at a cost of \$48,886. The length of the harbor and approach channel is 5,900 feet long. The width varies from 50 to 100 feet. The U.S. Army Corps of Engineers is authorized to maintain the harbor to a depth of 5 feet below the low control pool elevation of 667.0 feet mean sea level.

Dredging

The Corps investigated the benefit to cost ratio and found that it was not prudent to maintain the 5,900 foot long channel to its authorized depth. It has not been dredged with Corps funds since construction.

For more information, please contact the Corp's channel and harbors section at (651) 290-5150 or visit www.mvp.usace.army.mil
