¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
Wetland 2	0.14	acre(s)	(b)(1) Non-adjacent wetland.	<p>Based on aerial photos and ground level photos in the submitted wetland delineation report, Wetland 2 and 4 are surrounded by uplands, not abutting any a(1)-a(3) waters, and are not separated from one by a natural or man-made feature. These wetlands are not flooded in a typical year by an a(1)-a(3) water.</p> <p>The wetlands do not extend outside of the review area and are not adjacent to any other water. Based on the wetland delineation report and elevation profile, Wetlands 2 and 4 are closed depressions.</p> <p>Wetland 4 is an isolated feature. Saturated soils visible on aerial imagery indicate that diffuse storm water or overland flow from the Wetland 2 would connect to Wetland 3, which is an adjacent wetland. The nearest tributary from the Wetlands 2 and 4 is an unnamed tributary to the Rock River, which is 0.23 miles west of the review area. A review of the evaluation profile from the review area to the nearest tributary shows a series of elevation spikes eliminating the likelihood of the tributary to flood these wetland features.</p>
Wetland 4	0.05	acre(s)		

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

☒ Information submitted by, or on behalf of, the applicant/consultant: AJD Request submitted by MSA Professional Services on 9/29/2020

This information is sufficient for purposes of this AJD.

Rationale: N/A

☐ Data sheets prepared by the Corps: Title(s) and/or date(s).

☒ Photographs: Aerial and Other: Photos submitted in the AJD request

☐ Corps site visit(s) conducted on: Date(s).

☐ Previous Jurisdictional Determinations (AJDs or PJDs): ORM Number(s) and date(s).

☐ Antecedent Precipitation Tool: provide detailed discussion in Section III.B.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
