APPROVED JURISDICTIONAL DETERMINATION FORM U.S. Army Corps of Engineers

This form should be completed by following the instructions provided in Section IV of the JD Form Instructional Guidebook.

SECTION I: BACKGROUND INFORMATION

A. REPORT COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (JD): January 3, 2022

B. ST PAUL, MN DISTRICT OFFICE, FILE NAME, AND NUMBER: MVP-2021-02285-AJK

•	DDOTECTI	OCATION	ANIDDA	CIZCROLIND	INFORMATION:
().	PROJECTI	AUCATION	ANDKA	CKGKUUND	INFORWALION:

State	:WI County/parish/borough: Racine City: Mount Pleasant			
Center coordinates of site (lat/long in degree decimal format): Lat. 42.7027° N, Long87.9411° W.				
Universal Transverse Mercator: Zone 16N				
Name of nearest waterbody: Hoods Creek				
Name of watershed or Hydrologic Unit Code (HUC): Root River (0404000203)				
\boxtimes	Check if map/diagram of review area and/or potential jurisdictional areas is/are available upon request.			
	Check if other sites (e.g., offsite mitigation sites, disposal sites, etc) are associated with this action and are recorded on a			
_	different JD form.			

D. REVIEW PERFORMED FOR SITE EVALUATION (CHECK ALL THAT APPLY):

\boxtimes	Office (Desk) Determination. Date: November 18, 2021
	Field Determination. Date(s):

SECTION II: SUMMARY OF FINDINGS

A. RHA SECTION 10 DETERMINATION OF JURISDICTION.

There are no "navigable waters of the U.S." within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area.

B. CWA SECTION 404 DETERMINATION OF JURISDICTION.

There are no"waters of the U.S." within Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area.

1. Waters of the U.S.: N/A

2. Non-regulated waters/wetlands (check if applicable):¹

Potentially jurisdictional waters and/or wetlands were assessed within the review area and determined to be not jurisdictional. Explain: The review area contains three wetlands, labeled W-2 (0.10 acre), W-3 (0.50 acre), and W-4 (0.34 acre). These wetlands are isolated, per review of the August 2021 wetland delineation report by Evergreen Consultants LLC, which included a USGS topographic map, NRCS hydric soils data, 2-ft LIDAR contours, a Wisconsin Wetland Inventory map, a National Wetland Inventory map, a wetland aerial imagery assessment, historic aerial photos, and ground leve site photographs. All of the wetlands are located in shallow contour depressions surrounded by upland agricultural field. In some aerial photos, W-5 appears to be flooded over its delineated boundary, so these areas were reviewed in detail for any possible downstream surface water connections from W-5. According to the applicant's aerial imagery review, the areas surrounding W-5 exhibit standing water and crop stress in many wet years, but have normal vegetation (or not visible) in normal and dry years. Even in years where standing water floods W-5, there is no downstream connection to any waters as the contours are higher in elevation on all sides of W-5 (and same with W-3 and 4). Aerial photos from recent normal or dry years show no downstream flow paths associated with W-5. There are no visible inlets/outlets associated with the wetlands. The nearest tributary to these wetlands in Hoods Creek, approximately 880 square feet north of W-3.

These wetlands do not border, are not neighboring to or contiguous with another water of the US. They are not separated from another water of the US by man-made barriers, dikes, or berms. Due to existing and surrounding land use (upland agricultural fields) and proximity to other waters, there are no ecological connections to other wetlands or waters. These aquatic resources do not support a link to interstate or foreign commerce; are not known to be used by interstate or foreign travelers for recreation or other purposes; do not produce fish or shellfish that could be taken and sold in interstate or foreign commerce; and are not known to be used for industrial purposes by industries in interstate commerce. Therefore, the

¹ Supporting documentation is presented in Section III.F.

Corps has determined that W-2, W-3, and W-4 are not regulated by the Corps under Section 404 of the Clean Water Act.

SECTION III: CWA ANALYSIS

- A. TNWs AND WETLANDS ADJACENT TO TNWs: N/A
- B. CHARACTERISTICS OF TRIBUTARY (THAT IS NOT A TNW) AND ITS ADJACENT WETLANDS (IF ANY): N/A
- C. SIGNIFICANT NEXUS DETERMINATION: N/A
- D. DETERMINATIONS OF JURISDICTIONAL FINDINGS. THE SUBJECT WATERS/WETLANDS ARE (CHECK ALL THAT APPLY): $\ensuremath{\mathrm{N/A}}$
- E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS, INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, INCLUDING ANY SUCH WATERS (CHECK ALL THAT APPLY): N/A

	SUC	CH WATERS (CHECK ALL THAT APPLY): N/A
F.	\boxtimes	N-JURISDICTIONAL WATERS, INCLUDING WETLANDS (CHECK ALL THAT APPLY): If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements. Review area included isolated waters with no substantial nexus to interstate (or foreign) commerce. Prior to the Jan 2001 Supreme Court decision in "SWANCC," the review area would have been regulated based solely on the "Migratory Bird Rule" (MBR). Waters do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction. Explain: Other (explain, if not covered above):
	factoriudg	ride acreage estimates for non-jurisdictional waters in the review area, where the <u>sole</u> potential basis of jurisdiction is the MBR ors (i.e., presence of migratory birds, presence of endangered species, use of water for irrigated agriculture), using best professional grant (check all that apply): Non-wetland waters (i.e., rivers, streams): linear feet width (ft). Lakes/ponds: acres. Other non-wetland waters: acres. List type of aquatic resource: . Wetlands: 0.94 acres.
		vide acreage estimates for non-jurisdictional waters in the review area that do not meet the "Significant Nexus" standard, where such iding is required for jurisdiction (check all that apply): Non-wetland waters (i.e., rivers, streams): linear feet, width (ft). Lakes/ponds: acres. Other non-wetland waters: acres. List type of aquatic resource: Wetlands: acres.
	SUPI	N IV: DATA SOURCES. PORTING DATA. Data reviewed for JD (check all that apply - checked items shall be included in case file and, where checked requested, appropriately reference sources below):
		Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant: August 2021 wetland delineation
		ort by Evergreen Consultants, LLC
		Data sheets prepared/submitted by or on behalf of the applicant/consultant. Office concurs with data sheets/delineation report. Office does not concur with data sheets/delineation report. Data sheets prepared by the Corps: Corps navigable waters' study: U.S. Geological Survey Hydrologic Atlas: USGS NHD data. USGS 8 and 12 digit HUC maps.
	\boxtimes	U.S. Geological Survey map(s). Cite scale & quad name: Mount Pleasant Quadrangles
