B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE

REVIEW AREA ONLY INCLUDES DRY LAND: According to the off-site assessment, the project area is currently used for agricultural production. No watercourses, basins, or wetlands are identified on the National Wetlands Inventory or the MN DNR Public Waters Inventory. The USGS NHD map shows that an unnamed intermittent tributary is located approximately 700' north of the project area but it does not extend into the project area. In addition, the Waseca County Soil Survey Map shows predominately non-hydric soils throughout the project area.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
