

**U.S. Army Corps of Engineers, St. Paul District  
Regional Condition for Nationwide Permit 52**

On March 19, 2012 the Mississippi Valley Division Engineer approved a regional condition for Nationwide Permit 52 (Water-Based Renewable Energy Generation Pilot Projects). The text of the approved regional is provided below.

**NWP 52 does not authorize structures or work in Lake Michigan and Lake Superior within the geographic boundaries of the St. Paul District.**

This regional condition will remain in effect until March 18, 2017 unless modified, suspended, or revoked by the Division Engineer.

Activities not eligible for authorization under NWP52 will be reviewed by the St. Paul District under our letter of permission or standard individual permitting procedures.
