This application is being reviewed in accordance with the practices for documenting Corps jurisdiction under Sections 9 & 10 of the Rivers and Harbor Act of 1899 and Section 404 of the Clean Water Act identified in Regulatory Guidance Letter 07-01. We have made a preliminary determination that the aquatic resources that would be impacted by the proposed project are regulated by the Corps of Engineers under Section 404 of the Clean Water Act. Our jurisdictional review and final jurisdictional determination could result in modifications to the scope of the project's regulated waterbody/wetland impacts and compensatory mitigation requirements identified above. An approved jurisdictional determination will be made prior to reaching a permit decision, and will be posted on the St. Paul District web page at <http://www.mvp.usace.army.mil/>.

**Project Description and Purpose:** The applicant proposes to discharge fill material into 0.10 acre of wetlands adjacent to a tributary to Lake Superior for the construction of a driveway to access an upland residential home site. The wetland crossing would be approximately 113 feet long by 20 feet wide and include a turn radius at the intersection of USH 2.

Name, Area and Types of Waters (Including Wetlands) Subject to Loss: The project would result in a discharge of fill material into approximately 0.10-acre of scrub-shrub wetlands adjacent to a tributary to Lake Superior on the Bad River Indian Reservation.

Compensatory Mitigation: Compensation for the loss of 0.10-acre of scrub-shrub wetlands is not proposed.

**Drawings** See attached.

\*Data from BRNRD. Wetlands and uplands determined in the field 7/21/15 based on prior review by both BRNRD and ACOE on 7/14/15. Approved driveway location shows where driveway entrance should be positioned to minimize wetland impacts to the site.
