Other: (explain, if not covered above): **The agent submitted appropriate documentation in the delineation report that shows Area 1 (0.60 acre) was historically dry land prior to the basin being excavated. The 1937, 1957, 1964, 1970, 1980, 1990, 1997, and 2000 aerial photos show Area 2 to be dry land. The soils in Area 1 are mapped as Waukegan silt loam, 0 to 2 percent slopes, a well drained, non-hydric soil, and Dickman sandy loam 0 to 2 percent slopes, a somewhat excessively drained, non-hydric soil, according to the Scott County soil survey. Area 1 was constructed sometime between 2000 and 2006 in dry land for the purposes of treating stormwater; therefore, Area 1 is not a water of the US.**
