I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 2/16/2021

ORM Number: MVP-2020-02228-BBY

Associated JDs: N/A

Review Area Location¹: State/Territory: MN City: Corcoran County/Parish/Borough: Hennepin

Center Coordinates of Review Area: Latitude 45.137624 Longitude -93.542039

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- ☒ The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: The review area includes a 3.6 acre site in Corcoran, Minnesota. The property is currently used for agricultural production. No NWI mapped wetlands are found within the review area. The site is dominated by one hydric map unit: L23A Cordova clay loam (95% hydric). The off-site hydrology review looked at 13 normal precipitation year aerial photographs between 1981 and 2016 and found one year (2012) that exhibited any indicators of wetland hydrology. Based on information, no field site visit was required to investigate the suspect area per 2016 Joint Guidance between the St. Paul District and the Minnesota Board of Water and Soil Resources for Offsite Hydrology and Wetland Determinations. Therefore, the review area is composed entirely of dry land.
- ☐ There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- ☐ There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- ☐ There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
