¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters $((b)(1) - (b)(12))$: ⁴						
Exclusion Name	Exclusion	Size	Exclusion ⁵	Rationale for Exclusion Determination		
Wetland 1 Wetland 2	8.73 0.18	acre(s)	(b)(1) Non- adjacent wetland.	Wetlands 1 and 2 do not meet the definition of "adjacent wetlands". NHD and NWI maps confirm the wetlands are located within enclosed depressions that have no surface water connections to intermittent or perennial tributaries. The closest tributary as shown on the USGS Topographic map is Epiphany Creek approximately 630 feet northeast of Wetland 1. Based on 2-ft LIDAR contours, the wetlands are approximately the same elevation as the creek but are separated by a city road which is approximately 10 feet higher in elevation than the wetlands. USGS Hillshade maps and LIDAR 2-foot elevation contours do not indicate a direct above ground direct surface hydrological connection to an (a)(1)-(3) water. FEMA maps indicate that the wetlands are located in Zone AE (EL 851) which is defined as an area inundated by 1-percent-annual-chance flooding, so it is not likely to be inundated by flooding from a paragraph (a)(1)-(3) water in a typical year. Based on this review, the wetlands do not meet the definition of an adjacent wetland under the NWPR and are not waters of the US.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
