ADDITIONAL COMMENTS TO SUPPORT JD: This jurisdictional determination is applicable to the approximately 1.56 acre area identified as "Storm Water Pond" and the approximately 360 linear-foot adjacent channel on the enclosed figure labeled MVP-2018-02283-MMW Figure 2 of 3. The soils of the site are non-hydric. Historical imagery from 1991 to present day demonstrates the absence of the aquatic resource prior to 2006. The area was originally the location of a farmstead prior to mass grading of the subject property shown in aerial photos from 2006. Documentation of the stormwater pond and channel plans from 2005 with revisions in 2006 and the appearance of the stormwater pond and channel in a 2006 aerial image indicate that these aquatic resources were constructed in upland. It has been determined that the stormwater pond and adjacent channel are not waters of the US, and are not jurisdictional under the Clean Water Act.

<sup>1</sup> In many cases these excluded features will not be specifically identified on the approved JD form, unless specifically requested. Corps Districts may, in case-by-case instances, choose to identify some or all of these features within the review area.
