REGULATORY

The St. Paul District established in 1866

Driven to be a world-class district that delivers for our workforce, region, enterprise, and nation by building strong and taking care of people.

**NAVIGATION**
Providing safe, reliable, cost-effective, and environmentally sustainable waterborne transportation on the Upper Mississippi River.

- Maintaining a 9-ft. navigation channel and 13 locks and dams allows on average 16 billion tons of commodities to travel past Lock and Dam 10 in Guttenberg, Iowa, per year, saving $430 million to shipping industries using inland waterways instead of overland shipping.

**DISASTER RESPONSE**
Temporary housing team supported 320 disaster response or recovery response deployments since 2018.

**FLOOD RISK MANAGEMENT**
Reducing flood risk to communities in the Upper Midwest.

- Every dollar invested in the Corps' flood risk management program saves Americans $8.

**ENVIRONMENTAL SUSTAINABILITY**
Restoring and protecting habitat for fish and wildlife.

- 95 levee systems—165 miles—participate in our federal levee inspection program.

**SUPPORT TO OTHERS**
Providing world-class engineering solutions.

**FIELD OFFICES**
Protecting the nation’s aquatic resources for future generations.

**ENVIRONMENTAL INFRASTRUCTURE PROGRAM**
Assisted more than 50 communities with 77,000 acres of water infrastructure projects.

**RECREATION**
Supplying healthy, accessible outdoor recreational activities.

- 2.3 million visitors per year to our recreation sites spend $79 million in local regional economies.

**ENVIRONMENTAL SUSTAINABILITY**
Stewardship of Public Land

- Managed more than 77,000 acres of public land responsible for grassland, fisheries, forest, and wetland management.

**RECREATION**
Supplying healthy, accessible outdoor recreational activities.

- 650 campsites, 27 boat launch ramps, 49 recreation areas, 10 beaches.

**ENVIRONMENTAL SUSTAINABILITY**
Restoring and protecting habitat for fish and wildlife.

- Upper Mississippi River Restoration Program completed 28 restoration projects improving 45,000 acres of river or floodplain habitat.

**FLOOD RISK MANAGEMENT**
Reducing flood risk to communities in the Upper Midwest.

- On average, in the last 10 years, the St. Paul District flood risk management and emergency response activities saved $600 million per year.

- Examples of Projects:
  - Grand Forks/East Grand Forks
  - Mankato
  - Rochester
  - St. Paul
