ORM Number: MVP-2020-02314-KME

Associated JDs: N/A

Review Area Location¹: State/Territory: Wisconsin City: Wausau County/Parish/Borough: Marathon

Center Coordinates of Review Area: Latitude 44.9706 Longitude -89.65133

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- ☐ The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A
- ☐ There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- ☐ There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- ☒ There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
Wetland 1	0.002	acre(s)	(b)(1) Non-adjacent wetland.	The subject waters do not meet the definition of “adjacent wetlands”. Review confirmed the three wetlands are located within enclosed depressions that have no surface water connections to intermittent or perennial tributaries. They are not directly abutting any A(1) – A(3) waters. The investigated wetlands were determined to be hydrologically isolated and are therefore not regulated by the Corps under Section 404 of the Clean Water Act.
Wetland 2	0.001	acre(s)	(b)(1) Non-adjacent wetland.	
Wetland 3	0.009	acre(s)	(b)(1) Non-adjacent wetland.

Data Source (select)	Name and/or date and other relevant information
USGS Sources	N/A.
USDA Sources	USDA-NRCS WETS Tables, Field Office Climate Data-WETS Table, 2020 Monthly Precipitation Results, One Week Precipitation, Hydrologic Determination
NOAA Sources	N/A.
USACE Sources	N/A.
State/Local/Tribal Sources	Wisconsin DNR – Surface Water Data Viewer
Other information (specify)	Historical Aerial Photographs, 1938, 1948, 1951, 1960, 1968, 1979, 1980, 1992, 1998, 2005, 2006, 2008, 2010

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

B. Typical year assessment(s): N/A

C. Additional comments to support AJD: The site has a past history of grading and filling. Currently the entire site is a mowed lawn comprised primarily of upland vegetation. Wetland delineation report confirmed that Wetlands 1, 2, and 3 are located within a concave landscape positions or enclosed depressions that have no surface water connections to intermittent or perennial tributaries.
