¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
Wetland 2	.07	acre(s)	(b)(1) Non-adjacent wetland.	Wetland 2 does not abut an a(1)-(3) water and isn't inundated by flooding from an a(1)-(3) water in a typical year. The review area is in a flood zone which has a 1% annual chance of flooding, which is not representative of a typical year. Wetland 2 is not separated from an a(1)-(3) water by a natural or artificial feature nor does it have direct hydrological surface connection in a typical year. Wetland 2 continues off the review area to the south to abut a manmade ditch. The ditch is a result of execution and grading for Highway 175, there is about a 6-foot elevation change from the ditch to the highway. A review of historical aerial photos prior to 1978 does not show a wetness signature, therefore the area was upland before construction of Highway 175. On the opposite side of Highway 175 is Bower Creek. There is a culvert under Highway 175 west of the wetland. Review of aerial photos confirm this wetland does not continue to the culvert structure.

Other data sources used to aid in this determination:

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
