APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE**

**I. ADMINISTRATIVE INFORMATION**

Completion Date of Approved Jurisdictional Determination (AJD): 4/19/2021

ORM Number: MVP-2021-00405-MWM

Associated JDs: N/A

Review Area Location<sup>1</sup>: State/Territory: WI City: Oshkosh County/Parish/Borough: Winnebago

Center Coordinates of Review Area: Latitude 44.01005190 Longitude -88.61446370

**II. FINDINGS**

**A. Summary:** Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- ☐ The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A
- ☐ There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- ☐ There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- ☒ There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

**B. Rivers and Harbors Act of 1899 Section 10 (§ 10)<sup>2</sup>**

§ 10 Name	§ 10 Size	§ 10 Criteria	Rationale for § 10 Determination

<sup>1</sup> Map(s)/figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

**D. Excluded Waters or Features**

Excluded waters ((b)(1) – (b)(12)): <sup>4</sup>				
Exclusion Name	Exclusion Size		Exclusion <sup>5</sup>	Rationale for Exclusion Determination
Wetland B	0.098	acre(s)	(b)(1) Non-adjacent wetland.	Wetland B does not abut an a(1)-(3) water and isn't inundated by flooding from an a(1)-(3) water in a typical year. Wetland B is not separated from an a(1)-(3) water by a natural or artificial feature nor does it have direct hydrological surface connection in a typical year. Wetland B is completely surrounded by upland. The flood zone for the nearest tributary is not mapped. However, the nearest a(1)-(3) water is over 700 feet north along a topographic change of over 4 feet, the feature would not flood any part of the review area in a typical year. The nearest a(1)-(3) water is separated by a manmade feature with no artificial or natural feature connecting it to the site.
Wetland C1	0.013	acre(s)	(b)(5) Ditch that is not an (a)(1) or (a)(2) water, and those portions of a ditch constructed in an (a)(4) water that do not satisfy the conditions of (c)(1).	Roadside ditch constructed in uplands. No aerial photos were available without Linden Oaks Drive, the oldest aerial photos from 1974 show the ditch constructed. The toe slope was constructed to support runoff from the pavement, there is an elevation change of almost 4 feet from the street to the ditch.

**III. SUPPORTING INFORMATION**

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
