With the publication of this *Federal Register* notice, Corps divisions will begin finalizing regional conditions for these NWP's published in the December 27, 2021 issue of the *Federal Register* (86 FR 73522). Division Engineers will prepare supplemental documentation to address decisions concerning the addition of regional conditions to the NWP's. Regional conditions will provide additional protection for the aquatic environment, and will help ensure that the NWP's authorize only those activities that have no more than minimal adverse environmental effects. Regional conditions will help ensure protection of high value waters within St. Paul District, covering Minnesota and Wisconsin.

Corps divisions and districts will also begin determining which conditions for water quality certifications issued by states, tribes, and the EPA will become regional conditions of these NWP's. Water quality certification and Coastal Zone Management Act consistency regional conditions will be announced in a future public notice issued by the St. Paul District.
