☐ If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers
☐ Other: (explain, if not covered above): The review area contains several aquatic resources; however, this Approved JD is limited to the boundaries of Swale A (0.04 acre), Swale B (0.11 acre), Swale C (0.04 acre), Swale D (0.18 acre), and Swale E (0.14 acre). Swales A, B, C, D, and E were determined to be ditches that were constructed in uplands, have less than permanent flow, and do not drain a wetland. Per the Rapanos Guidance all five of these resources are not regulated waters under Section 404 of the Clean Water Act. The agent submitted a delineation report that detailed the historic conditions of these areas and it showed that they were all constructed in uplands as part of the soccer field project. The ditches receive storm water from the adjacent parking lot and soccer field and have a limited amount of flow during storm events.
