B. ADDITIONAL COMMENTS TO SUPPORT JD: There are no aquatic resources in the 10.6-acre review area. The applicant submitted sufficient information to demonstrate the review area contains no aquatic resources and no wetlands were identified on site. Information included the United States Fish and Wildlife Service (USFWS) National Wetland Inventory (NWI) maps, the Natural Resource Conservation Service (NRCS) soil survey maps, and the United States Geological Survey (USGS) map. The USFWS NWI maps did not identify any potential wetlands in the review area. A sampling point was described by the agent, Anderson Engineering, in the location of Natural Resource Conservation Service (NRCS)-identified hydric soils. The location did not have hydrophytic vegetation or hydric soils and was not wetland. The USGS map does not indicate the presence of any aquatic resources, such as tributaries or wetlands, within the review area. It is the U.S. Army Corps of Engineer's determination that the review area does not contain any waters of the U.S.
