There are no aquatic resources in the 7-acre review area. The applicant submitted information to demonstrate the review area contains no aquatic resources and no wetlands were identified on site. Information included the United States Fish and Wildlife Service (USFWS) National Wetland Inventory (NWI) maps, Natural Resource Conservation Service (NRCS) soil maps, and historical aerial photographs. The USFWS NWI did not identify any potential wetlands within the review area. Aerial photographs, taken between 1991 and 2015, were reviewed and a wet signature was identified in less than 30% of the normal years. Per an on-site investigation by the applicant and the Board of Water and Soil Resources, hydrophytic vegetation and wetland hydrology were not found on-site and the site did not have any features meet wetland criteria. The USGS map does not indicate the presence of any aquatic resources, such as tributaries or wetlands, within the review area. It is the U.S. Army Corps of Engineer's determination that the review area does not contain any waters of the U.S.
