II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- ☐ The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- ☐ There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- ☐ There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- ☒ There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
Wetland 20-1	2.74	acre(s)	(b)(1) Non-adjacent wetland.	Wetland 20-1 is located in the bottom of a depressional basin surrounded by a topographical rise of approximately 40 feet with no outlets. Precipitation flows from the surrounding slope into the basin where it pools and slowly filters into the water table; there is no outflow and does not contribute a surface flow directly or indirectly to an (a)(1) water.
Wetland 20-2	4.27	acre(s)	(b)(1) Non-adjacent wetland.	Wetland 20-2 is also located in the bottom of a depressional basin approximately 300 feet east of Wetland 20-1. This wetland is also surrounded by a hill slope with an elevation change of approximately 22 feet. Precipitation flows from the surrounding slope into the basin where it pools and filters into the water table because it cannot flow out. The wetland does not contribute a surface flow directly or indirectly to an (a)(1) water.

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

- ☒ Information submitted by, or on behalf of, the applicant/consultant: **NTS Wetland Delineation Report - May 2020**,

This information is sufficient for purposes of this AJD.

Rationale: **N/A or describe rationale for insufficiency (including partial insufficiency).**

- ☐ Data sheets prepared by the Corps: **Title(s) and/or date(s).**
- ☒ Photographs: **Other: NTS Delineation Photo Documentation**
- ☐ Corps site visit(s) conducted on: **Date(s).**

USGS Sources	N/A.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

B. Typical year assessment(s): [N/A or provide typical year assessment for each relevant data source used to support the conclusions in the AJD.](#)

C. Additional comments to support AJD: [Wetland 20-1 and Wetland 20-2 are not abutting a water identified in paragraph \(a\)\(1\)-\(a\)\(3\) of the NWPR, are not contributing a surface water flow directly or indirectly to an \(a\)\(1\) water, and are not inundated by flooding from an \(a\)\(1\)-\(a\)\(3\) water in a typical year. Both wetlands meet the \(b\)\(1\) exclusion as defined in the NWPR.](#)
