   □ Corps navigable waters' study:
   □ U.S. Geological Survey Hydrologic Atlas:
   □ USGS NHD data.
B. ADDITIONAL COMMENTS TO SUPPORT JD: The proposed pond would be constructed entirely in uplands, and all excess excavated material which would be generated from the pond excavation would be discharged in an offsite upland location. The project review area is comprised entirely of uplands. Based on this information, the proposed project would not result in the discharge of dredged or fill material into WOUUS and therefore the Corps has no jurisdiction over the proposed project.
